PAULA DEVCICH

Biomedical Engineering Master's Student

pauladevcich@gmail.com | +39 352 085 1616 | Turin, Italy | paula-devcich

EDUCATION

M.Sc. in Biomedical Engineering

Politecnico di Torino

2025 – Present | Turin, Italy

- Double-degree program in collaboration with Universidad Nacional de Córdoba (Argentina).
- Focus on biomedical systems, data analysis, and signal processing.

B.Sc. in Biomedical Engineering

Universidad Nacional de Córdoba

2021 – 2024 | Córdoba, Argentina

- Strong foundation in biomedical instrumentation, signal processing, and applied engineering.
- Experience in data analysis and programming using MATLAB and Python.

ACADEMIC EXPERIENCE

Tutor – Universidad Nacional de Córdoba

Hospital Engineering — Mar 2025 – Jul 2025

- Analysis of technical requirements and regulations for hospital environments (electrical systems, medical gases, safety).
- Assisted students in problem-solving and understanding of course concepts.

Signal Processing — Mar 2024 – Mar 2025

- Supported laboratory activities and development of Python scripts (Google Colab).
- Analysis and processing of biomedical signals and digital images.
- Assisted students in problem-solving and coursework.

LANGUAGES

- **Spanish:** Native
- **English:** B2 (IELTS 6.5)
- **Italian:** B2

PROFILE

Biomedical Engineering Master's student enrolled in a double-degree program between Universidad Nacional de Córdoba (Argentina) and Politecnico di Torino (Italy).
Currently seeking the opportunity to develop my Master's thesis in an industrial environment, where I can apply my knowledge, gain hands-on experience, and continue learning from professionals in the field.

PROJECTS

- **Blood Pressure Monitor Verification – Volunteer Project:** Participated in a community outreach program in underserved neighborhoods, performing functional verification of blood pressure monitors.
- **Arduino Workshop:** Hands-on workshop focused on Arduino programming and basic electronic applications.
- **Health Services Connect – Siemens Healthineers** Participated in technical session covering Nuclear Medicine,MRI, and CT.

SKILLS

Programming: Python (Google Colab) | MATLAB | Data Analysis | Signal Processing

Biomedical & Engineering: Biomedical Instrumentation | Medical Technologies | Machine Learning

Tools: Microsoft Office | LaTeX | Ansys Electronic

Soft Skills: Teamwork | Analytical Thinking | Adaptability | Proactive Attitude | Problem Solving

Further information on certifications and recommendation letters is available in my online portfolio: https://pauladevcich.github.io/.
