☎ +39 352 085 1616

📍 Turin, Italy

📅 11/02/2003

EDUCATION

M.Sc. in Biomedical Engineering

Politecnico di Torino

📅 2025 – Present 📍 Turin, Italy

- Double-degree program in collaboration with Universidad Nacional de Córdoba (Argentina).
- Focus on biomedical systems, data analysis, and signal processing.
- Current average grade: 26.8/30

B.Sc. in Biomedical Engineering

Universidad Nacional de Córdoba

📅 2021 – 2024 📍 Córdoba, Argentina

- Strong foundation in biomedical instrumentation, signal processing, and applied engineering.
- Experience in data analysis and programming using MATLAB and Python.
- GPA: 7.72/10 (Program historical average: 7.32/10)

ACADEMIC EXPERIENCE

Tutor – Universidad Nacional de Córdoba

Hospital Engineering

Mar 2025 – Jul 2025

- Analysis of technical requirements and regulations for hospital environments (electrical systems, medical gases, safety).
- Assisted students in problem-solving and understanding of course concepts.

Signal Processing

Mar 2024 – Mar 2025

- Supported laboratory activities and development of Python scripts (Google Colab).
- Analysis and processing of biomedical signals and digital images.
- Assisted students in problem-solving and coursework.

LANGUAGES

- **Spanish:** Native
- **English:** B2 (IELTS 6.5)
- **Italian:** B2 (PLIDA 98/120)

PROFILE

Biomedical Engineering Master's student enrolled in a double-degree program between Universidad Nacional de Córdoba (Argentina) and Politecnico di Torino (Italy). Currently seeking the opportunity to develop my Master's thesis in an industrial environment, where I can apply my knowledge, gain hands-on experience, and continue learning from professionals in the field.

PROJECTS

- **Blood Pressure Monitor Verification – Volunteer Project:** Participated in a community outreach program in underserved neighborhoods, performing functional verification of blood pressure monitors.
- **Arduino Workshop:** Hands-on workshop focused on Arduino programming and basic electronic applications.
- **Health Services Connect – Siemens Healthineers** Participated in technical session covering Nuclear Medicine, MRI, and CT.

SKILLS

Programming:

Python

MATLAB

LaTeX

Arduino

Biomedical & Engineering:

Machine Learning

Data Analysis

Signal Processing

Biomedical Instrumentation

Soft Skills:

Teamwork

Adaptability

Analytical Thinking

Problem Solving
